

Portal-Key to the 5th Dimension

Hokua'ia'ipua

Crystal-Star-Flower

A divine commission to YOU from the Primordial Source of all BEING

This portal key has been given to you as a symbol on earth to make it easier for you to integrate the gross and the subtle world into each other and to learn to understand it more deeply, because your body is changing into a new form of existence.

Since the year 2020 there is a synthesis between these two existing levels of perception.

The earth and all living beings rise high into the 5th dimension, where everything becomes one. **An existence in LIGHT and LOVE in the BREATH of life - ALOHA!**

Why is this necessary?

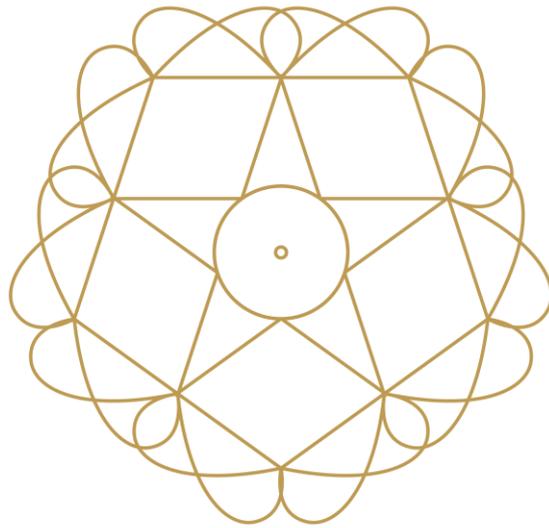

Only by remembering the original existence and the original mission of the soul on earth, it is possible for you as a human being to live in respect, consideration, attentiveness and absolute unconditional love towards the earth and everything that exists. So peace on earth can blossom.

The portal key supports you

- in waking up from the deceptive veil of the 3rd dimension
- for the coupling to the new matrix
- in the activation of your epiphysis (pineal gland, melatonin control)
- in the functions of your thymus and thyroid gland (hormone balance)
- as the light is transported into your cell structure
- during the crystallization of your DNA (recurring "new" 12 structure)
- in restoring your immune system to its original structure
- in memory of your original form
- in restoring your maximum order (I am)
- in expanding your empathic perceptions
- in the exercise of your telepathy
- during the unfolding in the 5th dimension

The target:

To be one with all that exists
Being one in light and love

Go into yourself and read this message from your source of I:

I am a being of bundled energy (LIGHT) on the planet Earth.
I receive light frequencies through the following three portals:

Through my Crown portal

I receive information from the soul level, which on the one hand is passed on to my brain cells and on the other hand activates my 5 heart chamber system (4 heart chambers + sinus).

Through my Third eye portal

Through my eyes and my mental eye (forehead) I receive light information. The crystalline cells of my pineal gland transmit this information to my individual organ cells and stimulate my primal memory (the short and long-term memory).

Through photosynthesis the crystal energy flows into my body.

Through my Heart portal

I absorb all the impulses of the electromagnetic fields, in which the physical life impulses are created from the sinus node.

The fullness arises from the emptiness within me! The real wonder of life.

How do I change physically?

In order to be able to remember the original knowledge as a human being, the previous human DNA, consisting of 2 strands of information, fragments into a crystalline 12-strand structure.

This crystalline structure of the body, which becomes more permeable, enables me to expand my consciousness beyond my seven senses, so that I can recognize the true meaning of life. With the dolphins, these expanded senses are still active. In humans, however, they were strongly lost due to the materially developed world.

The Crystal Star Flower helps me with this transformation, because all the necessary information is available in its energy elements.

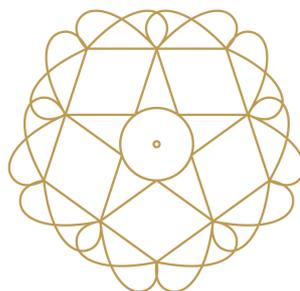

It vibrates in the higher Lemurian octave, the creative sound.

By looking at or laying on my body, the two energy fields connect. The vibration of the Crystal Star Flower connects with the vibration of my Higher Self and my heart. This makes it easier for me to renew, synchronize and stabilize the higher energy.

Through the transforming DNA structure my cells remember their self-healing powers and the original idea of the divine order.

The Crystal Star Flower activates the information of the original source in my new DNA (genetic information).

It connects the elements and stabilizes my inner balance, so that I can find my way better in this higher frequency.

The information flows from the unity of the different energy elements:

The circle - the light through the photons, everything is in flow

Α

Alpha - The beginning of everything

Ω

Omega - the recurring process of the constant
Becoming new, the all-embracing

γ

Gamma - the neutron, the atomic particle, the photon,
rounds the whole thing off

Theta - the source, the breath of God

Triangle - the three portals (crown, epiphysis, heart)
The connection of body, mind and soul

Rhomb - the double triangle in connection with sacred
geometry, divine intelligence and the biological order
with its proportions

As above, so below - the spiral movement

Heart - The zero point, the beginning and the end
The neutrality, the soul in the sinus node, the big bang

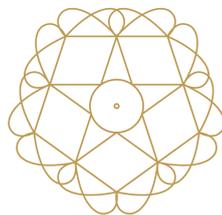

The pentagram (pentagon) - forms in its
12-fold doubling to the dodecahedron

The pentagonal star is derived from the pentagram and
radiates from the center in the golden section.

It connects the macrocosm with the microcosm

Zahl 0	Everything is one, everything is in flow, the center
Zahl 1	Alpha, the beginning, is contained everywhere, being All-One, the unity, perfection
Zahl 2	The WE, the duplication, light and love, duality, trust, faith, peace, perfection, the reflection
Zahl 3	The Gamma, which rounds off and unites everything, the wave
Zahl 5	Penta E=Q= God, free will, the 5-heart chamber system (4+sine), 5th dimension, pentagram
Zahl 6	Hexa, balance, harmony, the holy spirit, peace
Zahl 7	Ascension, the seven pillars of light for human tasks, new matrix
Zahl 8	Paradise, synchronisation, the higher Lemurian octave, infinity
Zahl 9	Jesus energy, the intention, the idea
Zahl 10	K = cosmos
Zahl 12	The M, the energy of Jesus Christ (Manuel), Mother Mary, Mary Magdalene, Archangel Michael, Archangel Metatron, Hawaiian alphabet, recurring 12-erDNA, the language of God, the divine order, 12 stands for ALL that exists

What does the name Hokua'ia'ipua mean?

It is the transmitted name in the Hawaiian language for crystal-Star Flower. In this primordial language their vibration is amplified and one for all the people in the world: equal in effect.

That's how you say it: Hokua..ia..i..pua

How do you use the portal key?

Variant 1: Look at the Crystal Star Flower in its individual elements. Take your time. Then go to its centre and speak aloud to yourself: Hokua'ia'ipua Repeat this as a mantra a few times until you feel that you are entering a new stillness. Then silently contemplate the center as long as it is right for you. At the end, thank him for the light food.

Variant 2: Lie down, take the Crystal Star Flower in your hand and contemplate it in its individual elements. Speak aloud to yourself: Hokua'ia'ipua Repeat this as a mantra a few times until you feel that you are entering a new stillness. Then place it on your forehead or heart and remain still in this position for as long as it is right for you. At the end, thank them for the light nourishment.

Energization of water

When you place water in glass on the Crystal Star Flower, the water crystals vibrate into the higher vibration of harmony and nourish you in the spirit of the divine order.

Neutralization of external radiation

When you are in the higher vibration of the 5th dimension, your cells neutralize the foreign radiation. A synchronisation, a union to a new higher whole is created within.

Wound healing

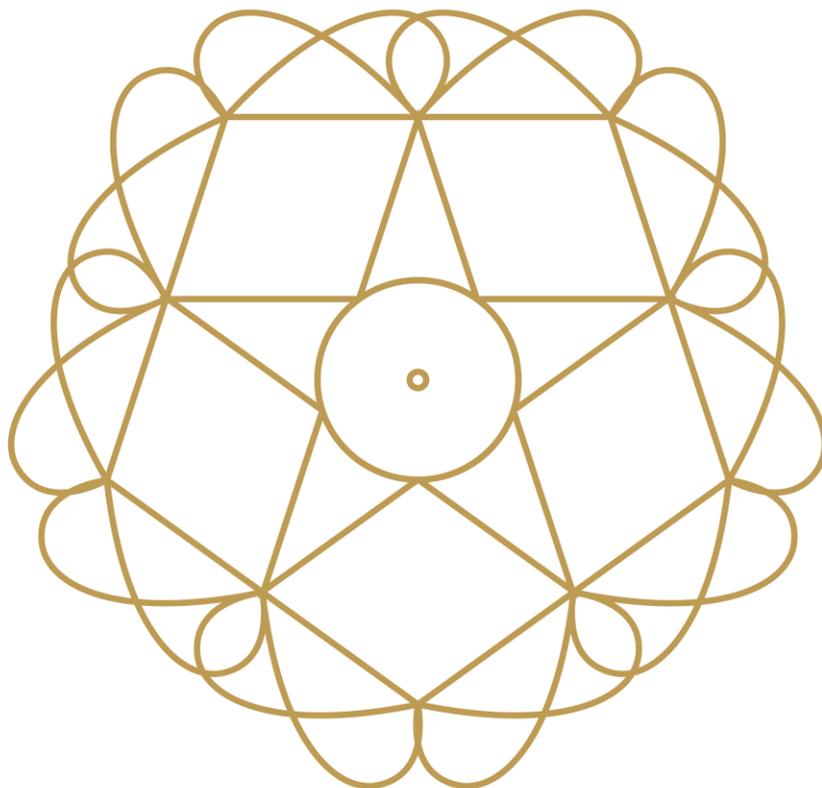

From the primal memory the self-healing of the cells is activated. You support this by visualising or placing the crystal starflower on the surface.

Hokua'ia'ipua

By focusing the energy of the elements in the portal key of the Crystal-Star-Flower, **the Apocalypse** - the revelation is promoted and makes the crystals of life shine!

Millions of stars, pouring their energies through the portal key, to make our world blossom again to what it originally was:

Paradise on Earth!
